**agroparts – your one-stop service for genuine spare-parts**

agroparts is the world's largest multi-brand platform for after-sales in the agricultural sector, combining the complete genuine spare-parts ranges of many brand manufacturers on one platform.

**This means:** a single login gives you access to first class genuine spare-parts information from participating manufacturers so you can quickly and easily order the genuine spare-parts you need.

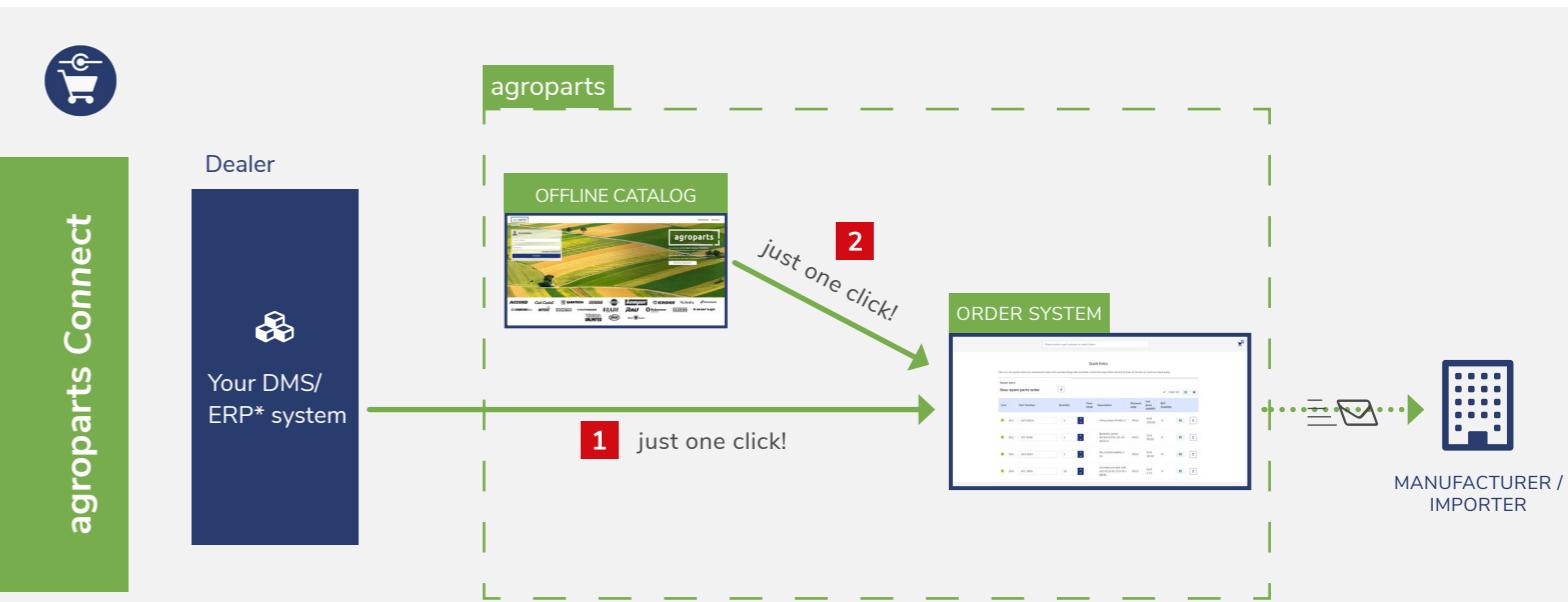

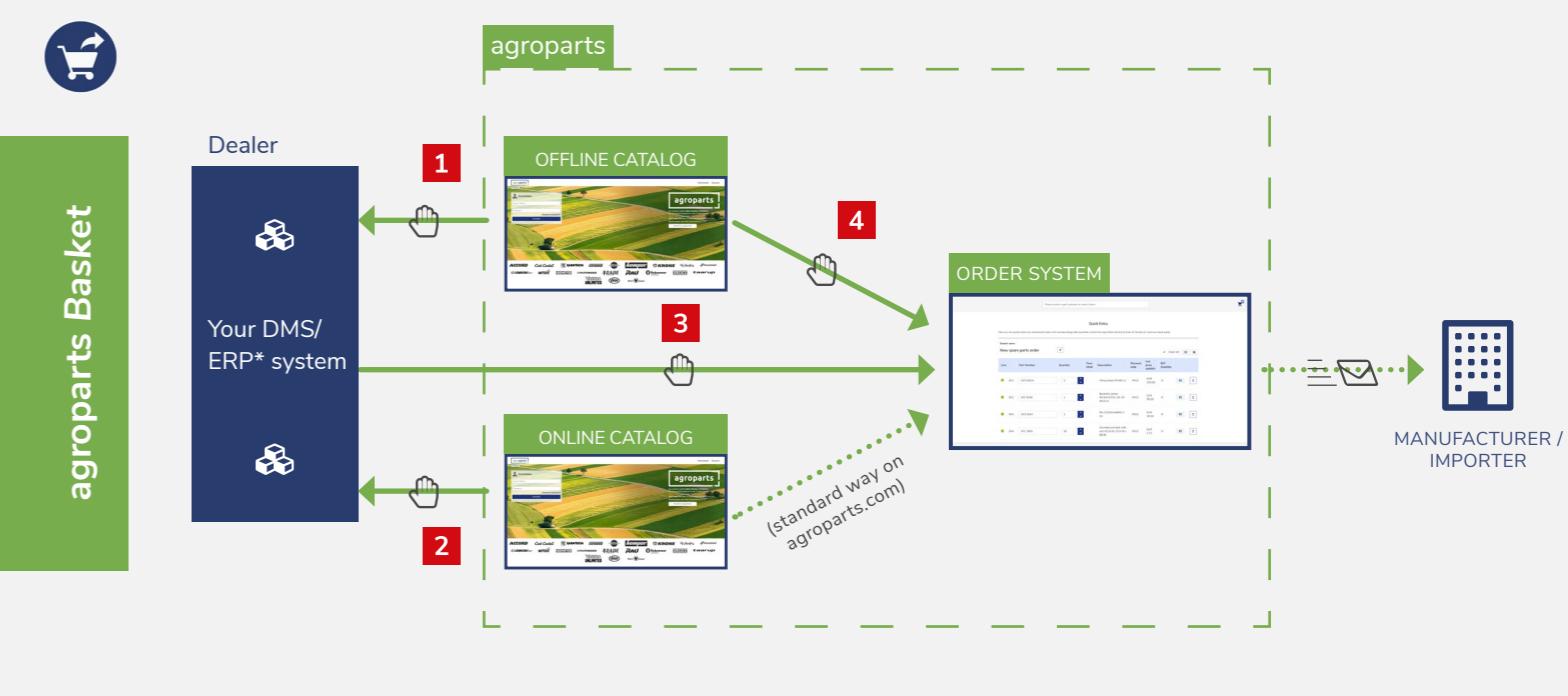

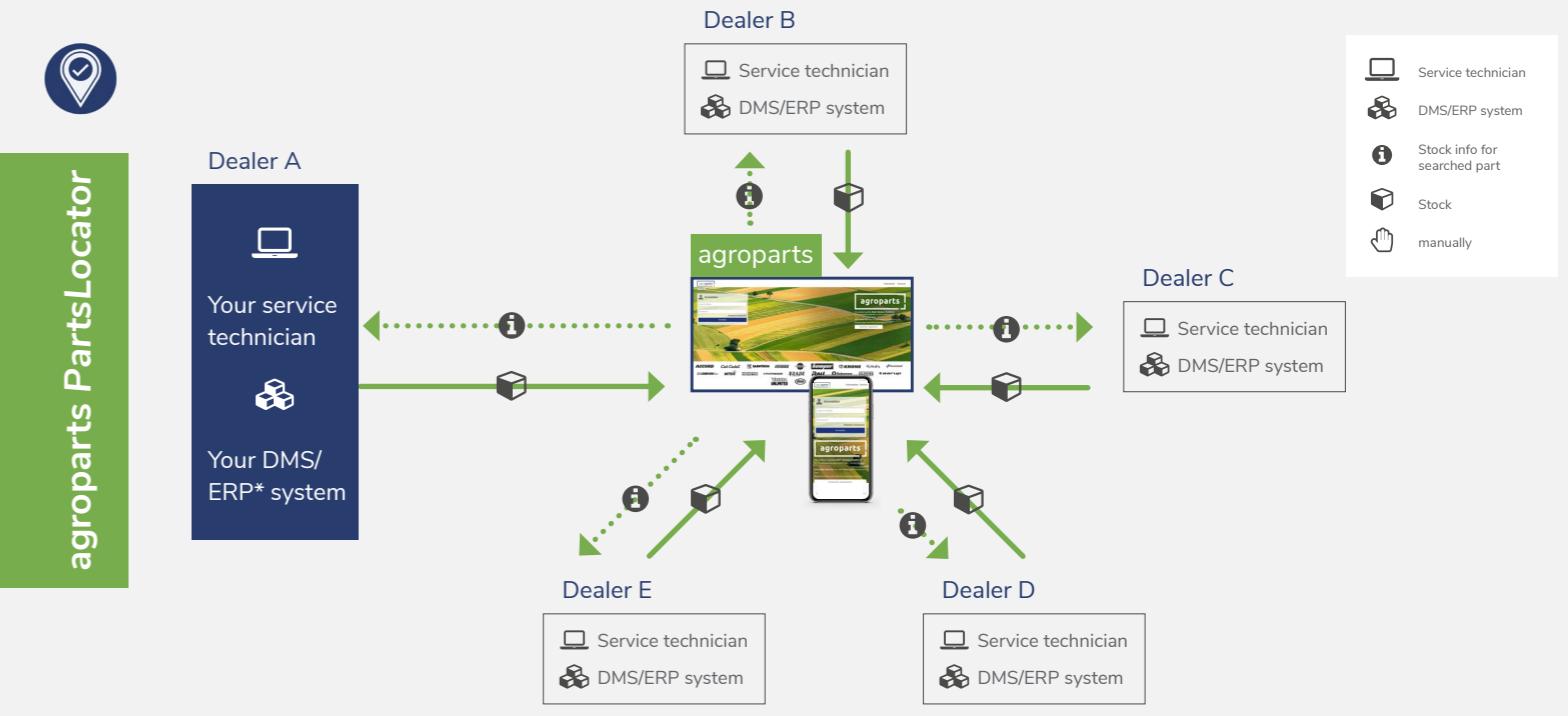

You benefit from the high level of standardisation that agroparts offers, because both the catalogues and the ordering process are the same no matter which manufacturer you choose.

The genuine spare-parts information and prices come directly from the manufacturers themselves, so they are always comprehensive and up to date.

Why not find out for yourself?

This agroparts brochure will show you everything you need to know about agroparts interfaces:

We explain the benefits that the interfaces provide in your daily work, how to set them up and use them.

Your benefits!

## agroparts PartsLocator – your benefits!

### Buying and selling genuine spare-parts

With the **agroparts PartsLocator**, you can show other authorized dealers who urgently need a spare part that you have it in stock. At the same time, you can search for urgently needed original spare parts yourself and significantly reduce your customers' downtime in an emergency!

In addition, while searching for parts on agroparts, you can check whether you have a part in stock or not. This saves a lot of time in everyday business! Read more about this on the next page.

The **agroparts PartsLocator** is an exclusive feature only available to authorized dealers who have been approved as such by the manufacturer.

Setup

### How to set up the agroparts PartsLocator!

- 1 If you are not yet an official dealer for the brand you would like to use the **agroparts PartsLocator** for, you will first need to activate **agroparts OrderManagement** with the respective manufacturer. Log in to [www.agroparts.com](http://www.agroparts.com), click on your desired brand and then on “**OrderManagement**” and follow the instructions.
- 2 After the activation, your DMS/ERP system provider needs to set up automatic stock data upload for the **agroparts PartsLocator**.

To do this, please contact your DMS/ERP system provider. Once you have successfully completed the setup, your inventory data is automatically uploaded to the **agroparts** server daily so you can take full advantage of **agroparts PartsLocator**.

**Our tip:** if you have multiple subsidiaries with parts warehouses, each of your locations should carry out the steps described above. This increases the visibility of your regional sites!

By the way: If you use the **agroparts PartsLocator** in combination with the **agroparts DealerShop**, you can sell your original spare parts easily and conveniently online to your end customers! If you are interested in the **agroparts DealerShop**, please contact [agroparts@lexcom.de](mailto:agroparts@lexcom.de).

How to use it

## This is how the **agroparts PartsLocator** works!

### You can call up the **agroparts PartsLocator** from two different places.

#### When searching for a part in the catalogue:

Select a part as usual in the **agroparts OnlineCatalog** and click on the shopping basket symbol shown above. The parts information window that opens will show the availability at the manufacturer as well as your own availability if you supply your stock data via agroparts. You will also see the stock for the selected part at other authorized dealers (please scroll down if necessary).

The same functionality is also available when you search for parts directly in the ordering system.

### In the agroparts brand world – when time is of the essence:

Do you already know the number of the part you require and know that the manufacturer cannot deliver it at the moment? Search directly in the brand world of the respective manufacturer for dealers who have this part in stock! Simply click on your chosen brand after you have logged in to [www.agroparts.com](http://www.agroparts.com) and then on “**PartsLocator**”. Now enter the part number in the appropriate field and click on “**Search**”.

## agroparts Basket – your benefits!

The **agroparts Basket** interface enables you to transfer shopping baskets easily and simply between your DMS/ERP system and **agroparts**.

This saves you a lot of time on a daily basis and avoids mistakes because part numbers that have been searched for or entered do not have to be manually entered again!

Work faster and more professionally with the **agroparts Basket**!

There are a number of possible ways to get to your shopping basket:

- 1 From **agroparts OfflineCatalog** to your DMS/ERP system
- 2 From **agroparts OnlineCatalog** to your DMS/ERP system
- 3 From your DMS/ERP system to **agroparts OrderManagement**
- 4 From **agroparts OfflineCatalog** to **agroparts OrderManagement**

1 **agroparts OfflineCatalog** → Your DMS/ERP system

### How to set up the **agroparts Basket**!

Before you can transfer a shopping basket from the **agroparts OfflineCatalog** to your DMS/ERP system, your DMS/ERP system provider must have implemented the **agroparts Basket** interface and, if necessary, set it up for you. Please contact your DMS/ERP system provider so they can explain the function to you.

### How to work with the **agroparts Basket**!

- 1 Click on the export button and select the storage location for your basket file.

- 2 You can now import the shopping basket you have just saved into your DMS/ERP system. If you do not know how to import a file into your DMS/ERP system, please contact your DMS/ERP system provider.

2 **agroparts OnlineCatalog** → Your DMS/ERP system

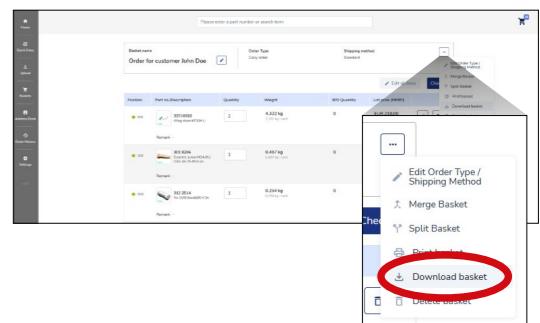

### How to set up the **agroparts Basket**!

Before you can transfer a shopping basket from the **agroparts OnlineCatalog** to your DMS/ERP system, your DMS/ERP system provider must have implemented the **agroparts Basket** interface and, if necessary, set it up for you. Please contact your DMS/ERP system provider so they can explain the function to you.

### How to work with the **agroparts Basket**!

- 1 Log in to [www.agroparts.com](http://www.agroparts.com), open the **agroparts OnlineCatalog** of the brand you want and fill your shopping basket as usual. Click on the shopping basket icon in the upper right corner.

- 2 Then click on the button with the three dots at the top right and then on "Download basket".

- 3 Please then select the format in which the shopping basket is to be downloaded (usually **agroparts Basket**).

- 4 You can now import the shopping basket you have just saved into your DMS/ERP system. If you do not know how to import a file into your DMS/ERP system, please contact your DMS/ERP system provider.

## 3 Your DMS/ERP system → agroparts OrderManagement

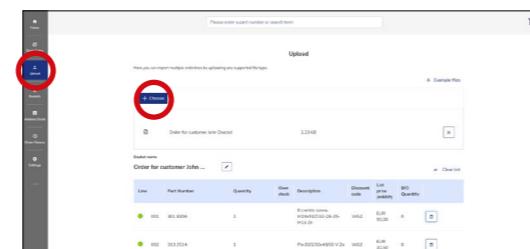

How to set up the **agroparts Basket**!

Before you can transfer a shopping basket from your DMS/ERP system to **agroparts OrderManagement**, your DMS/ERP system provider must have implemented the **agroparts Basket** interface and, if necessary, set it up for you. Please contact your DMS/ERP system provider so they can explain the function to you.

How to work with the **agroparts Basket**!

- 1 After your DMS/ERP system provider has set up the **agroparts Basket**, you can create a shopping basket in your DMS/ERP system as usual. Then save the shopping basket in **agroparts** format. If you do not know how to save a shopping basket in **agroparts** format in your DMS/ERP system, please contact your DMS/ERP system provider.
- 2 Then log in to [www.agroparts.com](http://www.agroparts.com) and open the **agroparts OnlineCatalog** of the brand you want. Click on the shopping basket icon in the upper right corner.

In the window that opens, click on “Load” and select the shopping basket file you want to upload in the following window. Click “Load” again.

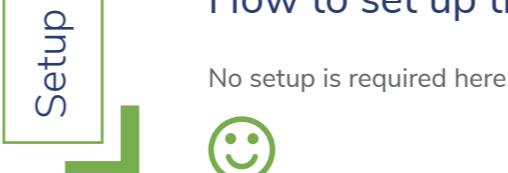

- 3 Now click at the bottom of the page on “Save and go to shopping basket”.

By the way: you can also complete these steps with just one click. Find out how in the **agroparts Connect** chapter.

## 4 agroparts OfflineCatalog → agroparts OrderManagement

How to set up the **agroparts Basket**!

No setup is required here.

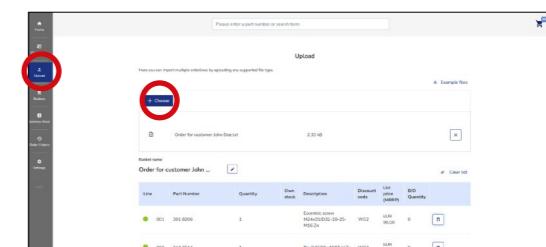

How to work with the **agroparts Basket**!

- 1 Fill up your shopping basket in the **agroparts OfflineCatalog** as usual. Then click on the export button.

- 2 Then log in to [www.agroparts.com](http://www.agroparts.com) and open the ordering system of the desired brand.

First click on “Upload”, then click on “Select” and select the desired shopping basket and upload it.

- 3 Now click at the bottom of the page on “Save and go to shopping basket”.

By the way: you can also complete these steps with just one click. Find out how in the **agroparts Connect** chapter.

## agroparts Connect – your benefits!

Transfer a shopping basket directly to **agroparts OrderManagement** – with just one click!

**agroparts Connect** is an extension of **agroparts Basket**.

If this interface is set up, you can transfer a shopping basket to **agroparts OrderManagement** with just a single click and process your order immediately. You no longer need to log in to [www.agroparts.com](http://www.agroparts.com) and manually save and open the shopping basket.

This saves you valuable time every time you order spare parts!

**You can get to your shopping basket with just one click in the following ways:**

- 1 Your DMS/ERP system → **agroparts OrderManagement**
- 2 **agroparts OfflineCatalogue** → **agroparts OrderManagement**

---

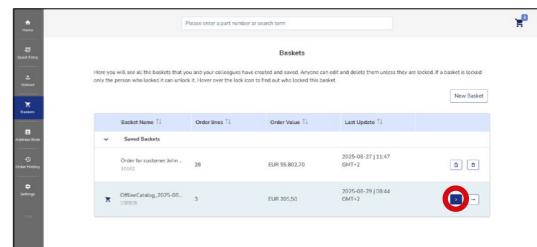

- 1 Your DMS/ERP system → **agroparts OrderManagement**

## This is how **agroparts Connect** works!

- 1 After your DMS/ERP system provider has set up **agroparts Connect**, you can create a shopping basket in your DMS/ERP system as usual. Then click on the button to export data to **agroparts**. If you do not know how to transfer a shopping basket with **agroparts Connect** in your DMS/ERP system, please contact your DMS/ERP system provider.

- 2 The upload will start and your internet browser opens automatically the shopping basket management of the ordering system.

- 3 A new shopping basket is automatically generated and named as follows "OfflineCatalogue\_[date]\_[time]". You can now select the shopping basket by clicking and continue working with it.

## How to set up **agroparts Connect**!

Before you can transfer a shopping basket **with just one click** from your DMS/ERP system to **agroparts OrderManagement**, your DMS/ERP system provider must have implemented the **agroparts Connect** interface and, if necessary, set it up for you. Please contact your DMS/ERP system provider so they can explain the function to you.

## How to use it

## Setup

## 2 agroparts OfflineCatalogue → agroparts OrderManagement

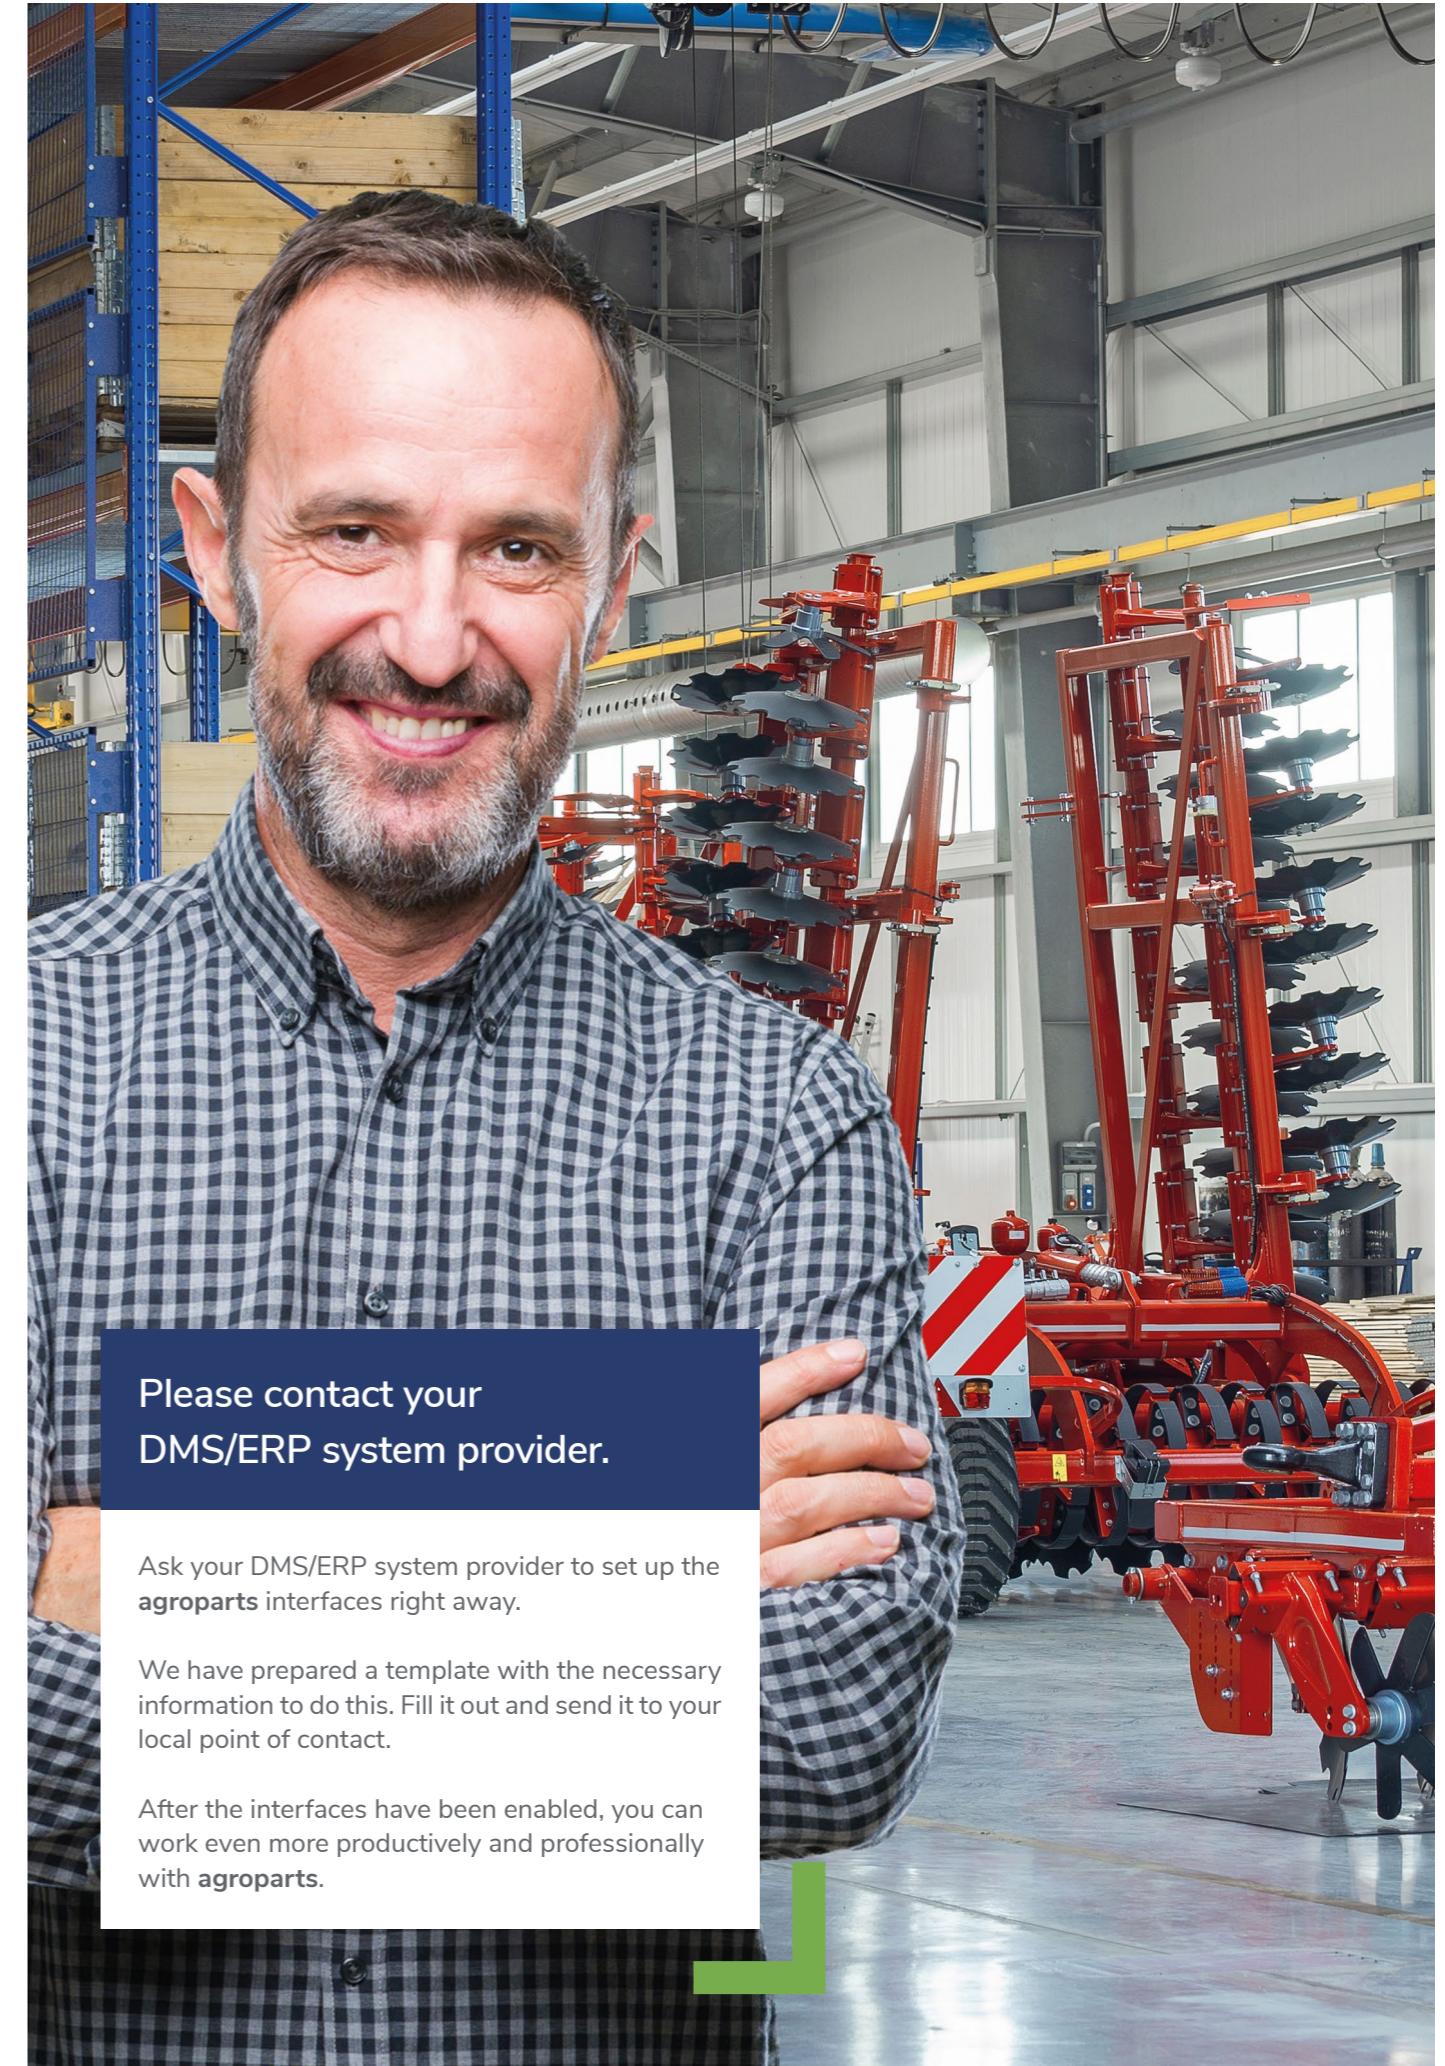

## How to set up agroparts Connect!

You don't have to do anything, **agroparts Connect** is already set up for you.

## This is how agroparts Connect works!

- 1 Open the **agroparts OfflineCatalog** of the brand you want and place items in the shopping basket as usual.
- 2 Click on the Upload button.
- 3 The upload is started and the shopping basket management of the ordering system opens automatically in your Internet browser.
- 4 A new shopping basket is automatically generated and named "**OfflineCatalogue\_[date]\_[time]**". You can now select the shopping basket by clicking on it and continue working with it.

Please contact your  
DMS/ERP system provider.

Ask your DMS/ERP system provider to set up the **agroparts** interfaces right away.

We have prepared a template with the necessary information to do this. Fill it out and send it to your local point of contact.

After the interfaces have been enabled, you can work even more productively and professionally with **agroparts**.
